The First Step in Establishing Your Business in the USA...

A USA BUSINESS IDENTITY

Having a USA “office and warehouse” shows your USA business commitment to your prospects and customers. It has proven to add value for businesses selling both products and services, and also for e-commerce websites. Your customers appreciate that you have eliminated their problems and concerns associated with cross-border business transactions. We can provide you with both a USA street address and a PO Box.

Your USA business address can be used for all business communications, such as advertising, receiving of mail, orders, inquiries, magazine subscriptions, catalogs, parcels and shipments. In particular, subscribing to the many available free US trade and industry magazines can provide important market intelligence and insight into your particular market sector.

For a more complete USA business identity package, many clients will also add a “remote call forwarding line” or a North American ‘800’ toll-free number.

In addition to establishing a “USA Business Identity”, we offer the below services allowing you to create a program that best benefits your business.
